SUMMARY

Full-stack developer with 3 years of experience building and deploying production web and mobile applications. Proficient in React, Node.js, Express, PostgreSQL, Supabase, and Kotlin. Built and shipped two live applications solving real problems for Ghanaian users: an AI-powered exam prep platform and a sales management system for small businesses. Strong foundation in REST APIs, authentication systems, and cloud deployment. CS student at KNUST seeking full-stack developer roles, internships, or freelance opportunities.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Kotlin, Python, HTML, CSS, SQL, Dart

Frontend: React.js, Tailwind CSS, Vite, Jetpack Compose, Flutter

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Nodemailer

Databases: PostgreSQL, Supabase, Firebase Firestore

Tools & Deployment: Git, GitHub, Vercel, Railway, Render, Claude API, Supabase Auth, Firebase Auth

PROJECTS

AcePrep | React, Node.js, Supabase, PostgreSQL, Kotlin

Mar 2026 – Present

AI-powered exam preparation platform for Ghanaian BECE and WASSCE students

- Architected a multi-codebase platform with 4 applications: React admin dashboard, React student web app, Node.js/Express REST API with Supabase/PostgreSQL, and Kotlin/Jetpack Compose Android app
- Integrated Claude's API as an AI tutor, routing student queries through a secure backend proxy with rate limiting and CORS protection
- Implemented JWT authentication with email verification via Nodemailer, school code generation, and role-based access control for students and administrators
- Built a question bank system covering JHS and SHS subjects with school-branded grade report generation
- Deployed backend to Railway and frontend dashboard to Vercel with CI/CD via GitHub

RetailTrack | React, Node.js, Supabase, PostgreSQL

Nov 2025 – Mar 2026

Sales and inventory management web app for small businesses in Ghana

- Built a full-stack application with React/Tailwind CSS frontend and Node.js/Express backend, deployed on Vercel and Render
- Implemented secure authentication with Firebase Auth, Google reCAPTCHA, and email verification for new accounts
- Developed real-time inventory tracking with automatic stock deduction on sales, low stock alerts, and product management
- Created PDF receipt generation, exportable sales reports (PDF and Excel), and interactive revenue/profit charts
- Designed mobile-responsive UI and optimized server wake-up performance for free-tier hosting

Live: <https://retailtracker.vercel.app>

GitHub: <https://github.com/wilfred-obodai/retailtrack>

QR Attendance System | HTML, CSS, JavaScript, Supabase

2026

QR code-based class attendance tracking system

- Built a QR code-based attendance tracker using vanilla JavaScript and Supabase for real-time data storage
 - Deployed on Vercel via GitHub with automated builds from the myattendance-qr repository
-

EXPERIENCE

Virtual Assistant | ALX Africa

Sep 2025 – Feb 2026

- Managed executive workflows including scheduling, research, and documentation across distributed remote teams over 6 months
 - Handled client communication, task prioritization, and deadline tracking using project management tools
 - Built operational discipline in remote collaboration now applied to managing multi-codebase software projects independently
-

EDUCATION

Bachelor of Science, Computer Science

Jan 2026 – Present

Kwame Nkrumah University of Science and Technology (KNUST), Kumasi

- Relevant coursework: Data Structures, Circuit Analysis, Operating Systems, Applied AI
 - Leading a computer vision team for the KNUST Claude Hackathon
 - Completed AI for All certificate program covering machine learning, prompt engineering, and ethical AI
-

CERTIFICATIONS

AI Course for All – KNUST, Jan 2026

Hashgraph Developer Attendance – The Hashgraph Association, Jan 2026

Applied AI Project – ALX Africa, Oct 2025
